Thermochimica Acta 255 (1995) 395–401

thermochimica acta

Subject index

Absolute scale
Calorimetric study of proton transfer processes of some dipeptides in water compared with the same processes in the gaseous phase 93
Accelerating rate equation
On-line method for isothermal kinetic analysis 329
Activation energy
Calculation of kinetic parameters from DTA curves using the characteristic temperature 241
Adsorbate
Performance of an integrated thermochemical heat pump/energy store 39
Alcohol
Excess enthalpies of 1-butanol–2-butanol–*n*-heptane, 1-hexanol–cyclohexanol–*n*-nonane, 2-butanol–*n*-heptane, 1-hexanol–cyclohexanol and cyclohexanol–*n*-nonane at 298.15 K 63
Alkane
Excess molar enthalpies of some 2,2-dimethyl-3,6-dioxaheptane + *n*-alkane binary mixtures at 298.15 K 17
Prediction of the temperature dependence of excess volumes in dilute solutions of 1-alkanol in *n*-alkane 379
Alkanol
Prediction of the temperature dependence of excess volumes in dilute solutions of 1-alkanol in *n*-alkane 379
Alkylhydroxybenzoate
Thermochemical investigation of possible interactions between urea and some sparingly soluble solutes in aqueous solution 83
Alloy
An isothermal flow calorimeter for use with corrosive solutions from 50 to 125°C 71
Ammonium carbonate
Effects of particle size on the decomposition of ammonium carbonate 347
Association model
Correlation of ternary excess molar enthalpies for mixtures containing an alkanol and two active non-associated components using a mole-fraction association model 23
Atmosphere
A method of assessing solid state reactivity illustrated by thermal decomposition experiments on sodium bicarbonate 255

Barium peroxide
Thermal decomposition of barium and strontium peroxides 143
Basicity
Calorimetric study of proton transfer processes of some dipeptides in water compared with the same processes in the gaseous phase 93
Binary system
An isothermal flow calorimeter for use with corrosive solutions from 50 to 125°C 71
Correlation of ternary excess molar enthalpies for mixtures containing an alkanol and two active non-associated components using a mole-fraction association model 23
Excess enthalpies of 1-butanol–2-butanol–*n*-heptane, 1-hexanol–cyclohexanol–*n*-nonane, 2-butanol–*n*-heptane, 1-hexanol–cyclohexanol and cyclohexanol–*n*-nonane at 298.15 K 63
Excess molar enthalpies of some 2,2-dimethyl-3,6-dioxaheptane + *n*-alkane binary mixtures at 298.15 K 17
Prediction of the temperature dependence of excess volumes in dilute solutions of 1-alkanol in *n*-alkane 379
Bismaleimide
A study of the thermal stability of metal bismaleimides and the thermal cyclodehydration of their precursors 355

Cadmium compound
Thermally stimulated currents of $(CH_2)_8$-$(NH_3)_2Fe_{1-x}Cd_xCl_4$ ($x = 0.15$–0.80) 171
Calcite
Calculation of kinetic parameters from DTA curves using the characteristic temperature 383
Calorimeter
A new calorimeter for measuring rapidly the thermal conductivity of liquids 365
Calorimetry
Calorimetric study of proton transfer processes of some dipeptides in water compared with the same processes in the gaseous phase 93
Heat capacity measurement with a heat flow calorimeter 1
Carbon disulphide
Thermogravimetric study of reduction and sulfurization of $Y_2(SO_4)_3$ using carbon disulfide 201
Catalyst
Kinetic study of H–Y zeolite regeneration by thermogravimetry 273
Thermal decomposition and FTIR study of pyridine adsorption on Pt/SiO_2 sonogel catalysts 319
Ceramic
Thermoanalytical features of $YBa_2Cu_3O_{7-x}$ 177
Chelate
Synthesis, spectral and structural characterization and thermal decomposition kinetics of dinitrato (*N*,*N*,*N*′,*N*′-tetra-*n*-butyl aliphatic diamide)urany(II) by thermogravimetric analysis 281
Cholic acid
Thermochemical decomposition of cholic acid and its derivatives 211
Coke
Kinetic study of H–Y zeolite regeneration by thermogravimetry 273
Coking coal
An investigation into the thermal behaviour of Bangladeshi coals 221
Complex formation model
Thermodynamic parameters for the formation of glycine complexes with magnesium(II), calcium(II), lead(II), manganese(II), cobalt(II), nickel(II), zinc(II) and cadmium(II) at different temperatures and ionic strengths, with particular reference to natural fluid conditions 109
Conductivity
A new calorimeter for measuring rapidly the thermal conductivity of liquids 365
Corrosion
An isothermal flow calorimeter for use with corrosive solutions from 50 to 125°C 71
Coupled technique
Preparation and thermal dehydration of manganese(II) dicarboxylate hydrates 155
Thermal decomposition and FTIR study of pyridine adsorption on Pt/SiO_2 sonogel catalysts 319
Crystallization
Suppression of crystallization in the binary system 1,2-propanediol–deuterium oxide. Comparison with light water as solvent 297
Cyclodehydration
A study of the thermal stability of metal bismaleimides and the thermal cyclodehydration of their precursors 355

Decelerating rate equation
On-line method for isothermal kinetic analysis 329
Decomposition
A method of assessing solid state reactivity illustrated by thermal decomposition experiments on sodium bicarbonate 255
Calculation of kinetic parameters from DTA curves using the characteristic temperature 241
Effects of particle size on the decomposition of ammonium carbonate 347
Thermal decomposition and FTIR study of pyridine adsorption on Pt/SiO_2 sonogel catalysts 319
Thermal decomposition of barium and strontium peroxides 143
Thermochemical decomposition of cholic acid and its derivatives 211
Thermosonimetry and microscopic observation of the thermal decomposition of potassium chlorate 341
Dehydration
Preparation and thermal dehydration of manganese(II) dicarboxylate hydrates 155
Thermal dehydration of magnesium selenate hydrates 33
Dentifrice
A method of assessing solid state reactivity illustrated by thermal decomposition experiments on sodium bicarbonate 255

Desiccant
Performance of an integrated thermochemical heat pump/energy store 39
Deuterium oxide
Suppression of crystallization in the binary system 1,2-propanediol–deuterium oxide. Comparison with light water as solvent 297
Dichlorobenzene
Thermal decomposition of rare earth element complexes with 2,6-dichlorobenzoic acid 191
Dimethyldioxaheptane
Excess molar enthalpies of some 2,2-dimethyl-3,6-dioxaheptane + *n*-alkane binary mixtures at 298.15 K 17
Dipeptide
Calorimetric study of proton transfer processes of some dipeptides in water compared with the same processes in the gaseous phase 93
DSC
Equilibrium phase diagram of the water–sucrose–NaCl system 49
Quantitative studies on the zirconium–potassium perchlorate–nitrocellulose pyrotechnic system using differential scanning calorimetry and chemical analysis 227
Thermal dehydration of magnesium selenate hydrates 33
DTA
A study of the thermal stability of metal bismaleimides and the thermal cyclodehydration of their precursors 355
An investigation into the thermal behaviour of Bangladeshi coals 221
Calculation of kinetic parameters from DTA curves using the characteristic temperature 241
Preparation and thermal dehydration of manganese(II) dicarboxylate hydrates 155
Thermal decomposition of rare earth element complexes with 2,6-dichlorobenzoic acid 191
Thermal dehydration of magnesium selenate hydrates 33
Thermoanalytical features of $YBa_2Cu_3O_{7-x}$ 177
Thermochemical decomposition of cholic acid and its derivatives 211
Thermosonimetry and microscopic observation of the thermal decomposition of potassium chlorate 341
DTG
Thermal decomposition of rare earth element complexes with 2,6-dichlorobenzoic acid 191
DTNTBA
Thermodynamical study on the formation of some bivalent metal complexes of biologically active *N*,*N*′-di-*p*-tolyl-5-nitro-2-thiobarbituric acid (DTNTBA) in aqueous solutions 371
DXRD
Calculation of kinetic parameters from DTA curves using the characteristic temperature 383

Effective ionic strength
Thermodynamic parameters for the formation of glycine complexes with magnesium(II), calcium(II), lead(II), manganese(II), cobalt(II), nickel(II), zinc(II) and cadmium(II) at different temperatures and ionic strengths, with particular reference to natural fluid conditions 109
ESM
Performance of an integrated thermochemical heat pump/energy store 39
Excess enthalpy
Correlation of ternary excess molar enthalpies for mixtures containing an alkanol and two active non-associated components using a mole-fraction association model 23
Excess enthalpies of 1-butanol–2-butanol–*n*-heptane, 1-hexanol–cyclohexanol–*n*-nonane, 2-butanol–*n*-heptane, 1-hexanol–cyclohexanol and cyclohexanol–*n*-nonane at 298.15 K 63
Excess heat capacity
Heat capacity measurement with a heat flow calorimeter 1
Excess molar enthalpy
Excess molar enthalpies of some 2,2-dimethyl-3,6-dioxaheptane + *n*-alkane binary mixtures at 298.15 K 17
Excess molar volume
Prediction of the temperature dependence of excess volumes in dilute solutions of 1-alkanol in *n*-alkane 379

Flory
Excess molar enthalpies of some 2,2-dimethyl-3,6-dioxaheptane + *n*-alkane binary mixtures at 298.15 K 17
Flow calorimeter
An isothermal flow calorimeter for use with corrosive solutions from 50 to 125°C 71
Free swelling index
An investigation into the thermal behaviour of Bangladeshi coals 221

FTIR
Thermal decomposition and FTIR study of pyridine adsorption on Pt/SiO_2 sonogel catalysts 319

Gibbs function
Thermochemical investigation of possible interactions between urea and some sparingly soluble solutes in aqueous solution 83
Glycine
Thermodynamic parameters for the formation of glycine complexes with magnesium(II), calcium(II), lead(II), manganese(II), cobalt(II), nickel(II), zinc(II) and cadmium(II) at different temperatures and ionic strengths, with particular reference to natural fluid conditions 109

Heat capacity
Heat capacity measurement with a heat flow calorimeter 1
Heat of dehydration
Thermal dehydration of magnesium selenate hydrates 33
Heat of formation
Thermal dehydration of magnesium selenate hydrates 33
Heat of mixing
An isothermal flow calorimeter for use with corrosive solutions from 50 to 125°C 71
Heat pump
Performance of an integrated thermochemical heat pump/energy store 39
Heat storage
Performance of an integrated thermochemical heat pump/energy store 39
HTS
Thermoanalytical features of $YBa_2Cu_3O_{7-x}$ 177
Hydrate
Equilibrium phase diagram of the water–sucrose–NaCl system 49

Iron compound
Thermally stimulated currents of $(CH_2)_8(NH_3)_2Fe_{1-x}Cd_xCl_4$ ($x = 0.15$–0.80) 171
Isothermal
An isothermal flow calorimeter for use with corrosive solutions from 50 to 125°C 71
Thermal decomposition of barium and strontium peroxides 143

Kinetic analysis
On-line method for isothermal kinetic analysis 329
Kinetics
A method of assessing solid state reactivity illustrated by thermal decomposition experiments on sodium bicarbonate 255
Calculation of kinetic parameters from DTA curves using the characteristic temperature 241
Preparation and thermal dehydration of manganese(II) dicarboxylate hydrates 155
Synthesis, spectral and structural characterization and thermal decomposition kinetics of dinitrato (*N,N,N',N'*-tetra-*n*-butyl aliphatic diamide)urany(II) by thermogravimetric analysis 281

Lanthanon compound
Thermal decomposition of rare earth element complexes with 2,6-dichlorobenzoic acid 191
Ligand
Synthesis, spectral and structural characterization and thermal decomposition kinetics of dinitrato (*N,N,N',N'*-tetra-*n*-butyl aliphatic diamide)urany(II) by thermogravimetric analysis 281
Thermodynamical study on the formation of some bivalent metal complexes of biologically active *N,N'*-di-*p*-tolyl-5-nitro-2-thiobarbituric acid (DTNTBA) in aqueous solutions 371
Liquid
A new calorimeter for measuring rapidly the thermal conductivity of liquids 365
Liquid mixture
Excess enthalpies of 1-butanol–2-butanol–*n*-heptane, 1-hexanol–cyclohexanol–*n*-nonane, 2-butanol–*n*-heptane, 1-hexanol–cyclohexanol and cyclohexanol–*n*-nonane at 298.15 K 63
Low temperature
Reaction calorimetry at low temperatures 9

Magnesium selenate hydrates
Thermal dehydration of magnesium selenate hydrates 33
Manganese dicarboxylatehydrate
Preparation and thermal dehydration of manganese(II) dicarboxylate hydrates 155
Mechanism
A method of assessing solid state reactivity illustrated by thermal decomposition experiments on sodium bicarbonate 255
Effects of particle size on the decomposition of ammonium carbonate 347

Thermal decomposition of barium and strontium peroxides 143
Methyl cholate
Thermochemical decomposition of cholic acid and its derivatives 211
Microcalorimetry
Excess molar enthalpies of some 2,2-dimethyl-3,6-dioxaheptane + *n*-alkane binary mixtures at 298.15 K 17
Microscopy
Thermosonimetry and microscopic observation of the thermal decomposition of potassium chlorate 341
Model
Thermodynamic parameters for the formation of glycine complexes with magnesium(II), calcium(II), lead(II), manganese(II), cobalt(II), nickel(II), zinc(II) and cadmium(II) at different temperatures and ionic strengths, with particular reference to natural fluid conditions 109
Molecular complexation
Correlation of ternary excess molar enthalpies for mixtures containing an alkanol and two active non-associated components using a mole-fraction association model 23
Monomer
A study of the thermal stability of metal bismaleimides and the thermal cyclodehydration of their precursors 355

Nitrocellulose
Quantitative studies on the zirconium–potassium perchlorate–nitrocellulose pyrotechnic system using differential scanning calorimetry and chemical analysis 227
Novel
A new calorimeter for measuring rapidly the thermal conductivity of liquids 365
Nucleation
Suppression of crystallization in the binary system 1,2-propanediol–deuterium oxide. Comparison with light water as solvent 297

On-line method
On-line method for isothermal kinetic analysis 329

Particle size
A method of assessing solid state reactivity illustrated by thermal decomposition experiments on sodium bicarbonate 255
Effects of particle size on the decomposition of ammonium carbonate 347

Phase diagram
Equilibrium phase diagram of the water–sucrose–NaCl system 49
Suppression of crystallization in the binary system 1,2-propanediol–deuterium oxide. Comparison with light water as solvent 297
Phenylalanine
Thermochemical investigation of possible interactions between urea and some sparingly soluble solutes in aqueous solution 83
Potassium chlorate
Thermosonimetry and microscopic observation of the thermal decomposition of potassium chlorate 341
Potassium perchlorate
Quantitative studies on the zirconium–potassium perchlorate–nitrocellulose pyrotechnic system using differential scanning calorimetry and chemical analysis 227
Preparation
Calculation of kinetic parameters from DTA curves using the characteristic temperature 383
Propanediol
Suppression of crystallization in the binary system 1,2-propanediol–deuterium oxide. Comparison with light water as solvent 297
Protonation constant
Thermodynamic parameters for the formation of glycine complexes with magnesium(II), calcium(II), lead(II), manganese(II), cobalt(II), nickel(II), zinc(II) and cadmium(II) at different temperatures and ionic strengths, with particular reference to natural fluid conditions 109
Proton–ligand stability
Thermodynamical study on the formation of some bivalent metal complexes of biologically active *N*,*N*′-di-*p*-tolyl-5-nitro-2-thiobarbituric acid (DTNTBA) in aqueous solutions 371
Proton transfer
Calorimetric study of proton transfer processes of some dipeptides in water compared with the same processes in the gaseous phase 93
Pyridine
Thermal decomposition and FTIR study of pyridine adsorption on Pt/SiO_2 sonogel catalysts 319
Pyrotechnics
Quantitative studies on the zirconium–potassium perchlorate–nitrocellulose pyrotechnic system using differential scanning calorimetry and chemical analysis 227

Reaction calorimetry
Reaction calorimetry at low temperatures 9
Reactivity
A method of assessing solid state reactivity illustrated by thermal decomposition experiments on sodium bicarbonate 255
Regeneration
Kinetic study of H–Y zeolite regeneration by thermogravimetry 273
Relative scale
Calorimetric study of proton transfer processes of some dipeptides in water compared with the same processes in the gaseous phase 93

Safety
Reaction calorimetry at low temperatures 9
Selenate
Thermal dehydration of magnesium selenate hydrates 33
Sigmoid rate equation
On-line method for isothermal kinetic analysis 329
SLE
Equilibrium phase diagram of the water–sucrose–NaCl system 49
Suppression of crystallization in the binary system 1,2-propanediol–deuterium oxide. Comparison with light water as solvent 297
Sodium bicarbonate
A method of assessing solid state reactivity illustrated by thermal decomposition experiments on sodium bicarbonate 255
Solubility
Thermal decomposition of rare earth element complexes with 2,6-dichlorobenzoic acid 191
Solute transfer
Thermochemical investigation of possible interactions between urea and some sparingly soluble solutes in aqueous solution 83
Sonogel
Thermal decomposition and FTIR study of pyridine adsorption on Pt/SiO_2 sonogel catalysts 319
Stability
A study of the thermal stability of metal bismaleimides and the thermal cyclodehydration of their precursors 355
Stability constant
Thermodynamical study on the formation of some bivalent metal complexes of biologically active *N,N'*-di-*p*-tolyl-5-nitro-2-thiobarbituric acid (DTNTBA) in aqueous solutions 371
Statistics
Calorimetric study of proton transfer processes of some dipeptides in water compared with the same processes in the gaseous phase 93
Steroid
Thermochemical decomposition of cholic acid and its derivatives 211
Stoichiometry
Equilibrium phase diagram of the water–sucrose–NaCl system 49
Strontium peroxide
Thermal decomposition of barium and strontium peroxides 143
Structural effect
Calorimetric study of proton transfer processes of some dipeptides in water compared with the same processes in the gaseous phase 93
Superconductor
Thermoanalytical features of $YBa_2Cu_3O_{7-x}$ 177
Surface
Calculation of kinetic parameters from DTA curves using the characteristic temperature 383

TA
A method of assessing solid state reactivity illustrated by thermal decomposition experiments on sodium bicarbonate 255
TBAD
Synthesis, spectral and structural characterization and thermal decomposition kinetics of dinitrato (*N,N,N',N'*-tetra-*n*-butyl aliphatic diamide)urany(II) by thermogravimetric analysis 281
Ternary system
Correlation of ternary excess molar enthalpies for mixtures containing an alkanol and two active non-associated components using a mole-fraction association model 23
Equilibrium phase diagram of the water–sucrose–NaCl system 49
Excess enthalpies of 1-butanol–2-butanol–*n*-heptane, 1-hexanol–cyclohexanol–*n*-nonane, 2-butanol–*n*-heptane, 1-hexanol–cyclohexanol and cyclohexanol–*n*-nonane at 298.15 K 63
TG
A study of the thermal stability of metal bismaleimides and the thermal cyclodehydration of their precursors 355

Preparation and thermal dehydration of manganese(II) dicarboxylate hydrates 155
Thermal decomposition of barium and strontium peroxides 143
Thermal decomposition of rare earth element complexes with 2,6-dichlorobenzoic acid 191
Thermogravimetric study of reduction and sulfurization of $Y_2(SO_4)_3$ using carbon disulfide 201

TGA
An investigation into the thermal behaviour of Bangladeshi coals 221
Calculation of kinetic parameters from DTA curves using the characteristic temperature 383
Thermochemical decomposition of cholic acid and its derivatives 211

Thermal safety
Reaction calorimetry at low temperatures 9

Thermodynamics
Thermodynamic parameters for the formation of glycine complexes with magnesium(II), calcium(II), lead(II), manganese(II), cobalt(II), nickel(II), zinc(II) and cadmium(II) at different temperatures and ionic strengths, with particular reference to natural fluid conditions 109

Thermogravimetry
Kinetic study of H–Y zeolite regeneration by thermogravimetry 273

Thermo-oxidation
Kinetic study of H–Y zeolite regeneration by thermogravimetry 273

TS
Thermosonimetry and microscopic observation of the thermal decomposition of potassium chlorate 341

TSC
Thermally stimulated currents of $(CH_2)_8(NH_3)_2Fe_{1-x}Cd_xCl_4$ ($x = 0.15$–0.80) 171

Uranyl
Synthesis, spectral and structural characterization and thermal decomposition kinetics of dinitrato (*N*,*N*,*N*′,*N*′-tetra-*n*-butyl aliphatic diamide)urany(II) by thermogravimetric analysis 281

Urea
Thermochemical investigation of possible interactions between urea and some sparingly soluble solutes in aqueous solution 83

Vitrification
Suppression of crystallization in the binary system 1,2-propanediol–deuterium oxide. Comparison with light water as solvent 297

Water
Suppression of crystallization in the binary system 1,2-propanediol–deuterium oxide. Comparison with light water as solvent 297

Yttrium disulphide
Thermogravimetric study of reduction and sulfurization of $Y_2(SO_4)_3$ using carbon disulfide 201

Yttrium oxysulphate
Thermogravimetric study of reduction and sulfurization of $Y_2(SO_4)_3$ using carbon disulfide 201

Yttrium oxysulphide
Thermogravimetric study of reduction and sulfurization of $Y_2(SO_4)_3$ using carbon disulfide 201

Yttrium sesquisulphide
Thermogravimetric study of reduction and sulfurization of $Y_2(SO_4)_3$ using carbon disulfide 201

Yttrium sulphate
Thermogravimetric study of reduction and sulfurization of $Y_2(SO_4)_3$ using carbon disulfide 201

Zeolite
Kinetic study of H–Y zeolite regeneration by thermogravimetry 273

Zirconium
Quantitative studies on the zirconium–potassium perchlorate–nitrocellulose pyrotechnic system using differential scanning calorimetry and chemical analysis 227
